Threat Modelization

Policy development for a Full Defense Chain

Children Security Innovation (Services & Products)

I use my skills and network to shape the future of toddlers and children safety.

I aim at structuring the nepiocrime and pedocrime strategy and developing a new ecosystem to ensure Children's Safety, Security and Integrity.

I have a "tech enabled" defense vision, involving many professionals that were never brought to the table before.

"Nepios" : the pre-verbal child in greek

My background : I have been a cybersecurity professional for over 12 years with experience in several areas of cybersecurity (industrial, enterprise). Able to manage cybersecurity integration projects, I currently provide digital security governance consulting.

EXPERIENCES

President of #IWAS Association

#IWAS

#IWAS - Since April 2022

- Organization of seminars and webinars for professionals around the issue of pedocrime and nepiocrime, and "chemical submission" topic (on children).
- International network over LINKEDIN (23400 followers) to learn from and share different approaches, tools (technological and methodological) in this area.
- Translation to French of the ReDirection website to provide autonomous and anonymous always available resource for CSAM viewers. (soon online)
- Psycho-trauma Packages made available to boost french knowledge : books, podcasts, ISSTD, PESI contents and many more...
- Data driven approach to empower pedocrime Victims, Law Enforcement Authorities, trusted Startups (already selected by Law Enforcement bodies) : drafting Digital applications on these topics.
- Design of a complete policy [that mimics the Cybersecurity policy] to reduce pedo-risk to a residual level.
- Methodology to monitor pedo-risk. Management System of Children's Security with Sexual Integrity as basic security objective. Focus on Pre-Verbals.

President-Director of T&C

THIBIERGE & COMPANIES. - Since December 2019 -

Freelancer - France

- As a part-time Chief Information Systems Security Officer (CISO), I manage the cybersecurity approach on an organizational and/or geographical perimeter within your organization. I define or decline, depending on the size of the organization, the information systems security policy (prevention, protection, detection, resilience, remediation) and ensure its application. I provide advice, assistance, information, training and alerts, in particular to business managers and/or management within their scope.
- As a transition CISO, I ensure the implementation of solutions and operational processes to guarantee data protection and the level of security of information systems. Depending on the size of your organization, I play an operational role in the implementation of the IS security policy or manage your team.
- Services for cybersecurity governance: drafting of cybersecurity policy, implementation of 27k standards, preparation for organizational security audits.
- Outsourcing of cyber pure-players: in particular cybersecurity questionnaire for stakeholders, contribution to all types of deliverables including cybersecurity translations.
- Responsible for "Information Systems security projects": I define, implement and lead projects for the deployment of security solutions and tools, in line with the security objectives set by the organization.
- "Project security" manager: I take into account the security aspects of Information Systems in the context of the design and implementation of an IT or business project. I assist the business project manager and the IT project manager on these aspects. I integrate the processing of personal data into the projects.
- Assistance services in choosing solutions for the digital resilience of end customers (individuals/companies). Example: teleconsultations for VIPs on their cybersecurity.
- Mentoring, coaching and training in cybersecurity for uninitiated IT professionals, and for raising awareness among staff, Service Departments, and General Management.
- Business Development, outsourced project management and consulting for cybersecurity startups, particularly within the framework of the Cybersecurity Small Business Club (CSBC by Thibierge & Companies. upon invitation)
- Services to cybersecurity professionals for their personal and professional resilience.

INFORMATION TECHNOLOGY SECURITY PROJECT MANAGER

CS GROUP - May 2016 to November 2019

- Infrastructure : System & Network security for an Industrial Site. Piloting of a project for Secure Architecture with Administration Bastions : Negotiation of services, supervision of system architects, identification of complementary external profiles, animation of conferences-call, customer communication, team support (training, skills development). Successful e-industrial experience.
- Piloting the integration of a SIEM and setting up a SOC for a Ministry: scheduling of services by 6 engineers, procurement and organization of logistics for the complete system, sequencing of the development and integration phases internally and vis-à-vis the customer. Successful integration and SOC start.
- Maintenance in Operational Conditions of platforms, Migration to a new timestamp system (trusted encryption solutions): Drafting of commercial proposals, management of services by 4 engineers, supervision of the migration, followed by the handling by the customer team.

- Projects to implement encryption solutions at several major accounts. Coordination of POCs, animation of workshops with 1 engineer, follow-up of technical questions, successful handling of the solution.

SKILLS

VALUES

- Inclusion / Mixed binomials ★★★★★
- A curious attitude, which questions all the time, which probes more deeply ★★★★★
- Responsible for one's personal resilience ★★★★★
- Responsible for the resilience, harmony and longevity of his interlocutors ★★★★★
- Formality in communications ★★★★★
- Integrity / Neutrality

TELEWORKING MANAGEMENT

- Sustainable approach through physiology and psychology ★★★★★
- Ability to positively influence the manager and team members ★★★★★
- Support, project management and information system management ★★★★★

CYBERSECURITY PROJECT MANAGEMENT

- Internal communication & project flow ★★★★★
- Pedagogy within the team ★★★★★
- Knowledge & sharing of repositories ★★★★★
- Production quality, understanding by customers ★★★★★
- Manage projects, drive change, coordinate teams in SME environment ★★★★★

METHODOLOGIES

- EBIOS digital risk analysis method ★★★★★
- In-depth knowledge / Procedural compliance / Technical capacity ★★★★★

TECHNICAL

- Continuous technological watch in cybersecurity ★★★★★
- Office suites OpenOffice / LibreOffice, MS Project ★★★★★
- Scientific Text Software Latex (TexMaker, Gutenberg Association) ★★★★★

LANGUAGES

- ENGLISH PROFESSIONAL AND TECHNICAL ★★★★★
- SPANISH FLUENT ★★★★★
- PORTUGUESE FLUENT ★★★★★

EDUCATION

MANAGEMENT

EM-LYON

1998 to 2002

Entrepreneurship & Innovation Marketing Specialization
Including one semester in MBA at WASEDA University, Tokyo, Japan

Continuing Professional Development

IPPPRI2025

May 2025

IPPPRI's annual conference is an important event that brings together the highest profile national and international speakers dedicated to tackling the global challenge of sexual abuse of children online.

Cybersecurity referent in SMEs

ITESCIA

July 2020

Training labeled "SecNumedu-FC" by ANSSI

SECURITY OF DIGITAL USES

INHESJ

2015 to 2016

Over 1 year at a rate of 2 days per month
Digital Security Certificate (INHESJ)
The program aims to deliver the know-how aimed at identifying, evaluating and controlling all the risks and malicious acts associated with information systems.
